Summary

I am a dedicated and enthusiastic student of software engineering with a profound passion for science. I am continually driven to expand my knowledge and engage in the creation of innovative projects.

Education

Bachelor of Computer science

Cairo University, Egypt

Expected graduation year: 2027

Projects

- Light tracker robotic
 - Was the team leader for this team and was responsible for choosing components and assigning tasks.
 - Designed the tracking algorithm and implemented it on an Arduino microcontroller.
 - Made the final presentation and reports on Microsoft Power point and Word.
- Image filters app
 - Implemented 7 filters in the app using C++.
 - Designed built the GUI using Qt framework.
- Indie game studio website
- Whiteboard
- Solar system orbits simulation

Freelance experience

- Served a Saudi client by developing an automated solution that utilized Python to transform data from an Excel sheet into a PowerPoint presentation.
- Worked on an E-Commerce for sports equipment using Django framework.

Volunteering experience

- At the IEEE Cairo University Student Branch, I work as a web instructor. My responsibilities include creating sessions and presentations for both front-end and back-end content, assigning tasks, and helping participants acquire the knowledge needed to work in the web industry.

Extracurricular Activities

- I'm building a game development team that makes enjoyable games and explores new tech in the industry.
